EDUCATION

Georgia Institute of Technology | M.S. in Computer Science
GPA: 4.0

Jan. 2026 - Present

University of California - Irvine | B.S. in Computer Science
GPA: 3.97, Cum Laude, Dean's Honor List for all quarters

Sept. 2021 - Dec. 2024

EXPERIENCE

The Trade Desk | Software Engineer, Privacy and Data Governance Team
C#, .NET, AWS S3, REST APIs, GraphQL APIs, Apache Airflow

Feb. 2025 - Present

- Developed a new privacy framework for centralized management of sensitive data and associated data policies across multiple systems
- Led the integration of the privacy framework in a high-throughput ad-tag processing pipeline, ensuring regulatory compliance by parsing ad tag URLs and dynamically sanitizing and transforming request data according to data policies
- Extended a GraphQL API consumed by customer-facing platforms to detect and alert on violations of internal policies
- Collaborated with cross-functional teams to ensure scalability, adaptability, and clear developer understanding of how sensitive data should be used throughout The Trade Desk's platforms

The Trade Desk | Software Engineer Intern, Privacy and Data Governance Team

June - Sept. 2024

C#, .NET, Javascript, Typescript, Scala, AWS S3, AWS IAM, AWS CloudFront, Apache Spark, REST APIs, GraphQL APIs, Jira API

- Developed a new workflow for advertisers to notify The Trade Desk of users opting out of data tracking via a custom script and REST API endpoint and handler
- Configured a new CI/CD Gitlab pipeline and runner with a new AWS IAM role for secure script distribution
- Designed and incorporated another opt-out workflow into an existing Real-Time Conversion Events API and SDK
- Extended a Scala-based Spark process to automate fetching data from AWS S3 and posting it as comments on Jira tickets

Gotchoo | Student Developer, UC Irvine Capstone Project Course

Jan. - June 2024

Vite, Javascript (React, MUI), Tailwind CSS, AWS (Amplify, Cognito, DynamoDB, Lambda)

- Wrote a design document for an AWS DynamoDB NoSql database, detailing the schema and design considerations
- Built front end components for Gotchoo's gifting service Retailer Hub website with Vite, React, MUI, and Tailwind CSS
- Created authentication flows depending on AWS Cognito user groups through AWS Amplify

PROJECTS

Vacation Schedule Manager Application

Apr. 2023

Javascript (React Bootstrap, Next.js, JSX), Firebase, REST APIs, SCSS | github.com/alam7989/beep-beep

- Developed a full stack web application with 3 teammates for creating and managing vacation schedules
- Implemented an account registration and login system using Next.js and React Bootstrap, with user credentials automatically added to a Firebase database
- Integrated Yelp Fusion API and a geocoding API to find popular businesses near a selected location

Collaborative Drawing Application

Nov. 2022

Python (Flask, SQLAlchemy), HTML, Javascript, CSS | github.com/alam7989/zotdots

- Engineered a full stack web application using Flask, enabling collaborative drawing on a shared canvas
- Displayed real-time updates to the canvas by updating a database via SQLAlchemy and Javascript after each edit

LEADERSHIP AND EXTRACURRICULARS

Introductory Computer Organization and Systems Design | Learning Assistant

Sept. 2023 - June 2025

- Facilitated student learning by leading 2 lab sessions every week and supporting Teaching Assistants during office hours
- Planned and discussed course curriculum and student progress in weekly meetings with professors and other course staff

VenusHacks | Corporate Committee Chair and Advisor, Logistics Organizer, Website developer

Feb. 2023 - June 2025

- Coordinated among 30 organizers and managed 11 peers to plan and supervise UCI's largest annual women-centric hackathon, with 200+ attendees in 2023, 2024, and 2025
- Fostered relationships with 5 companies and UCI offices to secure over \$15,000 in sponsorship funds each year

SKILLS

- **Programming Languages:** Python, C#, C, C++, HTML, CSS, Javascript, TypeScript, MIPS assembly, SQL, Scala, Swift
- **Technologies and Tools:** Git/GitHub/GitLab, Amazon Web Services (DynamoDB, Amplify, Cognito, S3, IAM, CloudFront), MySQL, PostgreSQL, MongoDB, Kubernetes, Jira, Confluence
